Chennai, India | +91 70923 07860 | baghirmohammed@gmail.com | [linkedin.com/in/mohammed-baghir](https://www.linkedin.com/in/mohammed-baghir) | github.com/Mohammed-Baghir

PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student specializing in Data Science & AI, with hands-on project experience in Python, JavaScript, React.js, Node.js, Express.js, MongoDB, and data analysis libraries. Interested in building practical ML models and full-stack software solutions. Active contributor to department events, hackathons, and community outreach initiatives, with demonstrated leadership and public-speaking experience.

EDUCATION

2023 – 2027 **Dr. M.G.R. Educational and Research Institute** — B.Tech CSE (DS & AI)
Chennai, Tamil Nadu

TECHNICAL SKILLS

Languages: Python, MySQL, JavaScript, HTML/CSS

Frameworks: React, Django, Streamlit, Node.js

Developer Tools: Git, GitHub, VS Code, Visual Studio, Docker, Kubernetes, OpenShift, CI/CD basics, Antigravity

Libraries: pandas, NumPy, Matplotlib, Scipy, Keras, NLTK, Scikit-Learn

Stack: MERN Stack

PROJECTS

PPE Detection and Monitoring AI Model | AI / Computer Vision

Tech Stack: Python, OpenCV, YOLO, NumPy

- Built an AI-based safety monitoring solution to detect helmets, safety jackets, and other PPE from visual input.
- Trained and fine-tuned a YOLO object detection model on a custom-labeled PPE dataset for real-time detection.
- Designed the system to identify PPE non-compliance and support automated safety monitoring in construction and mining environments.

GiftLink Full-Stack Capstone Project | Full-Stack Web Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack web application with a React frontend and Node.js/Express backend connected to MongoDB.
- Implemented user authentication and authorization using JWT with RESTful backend services.
- Integrated application services and structured the project with CI/CD and containerization-ready deployment.

Customer Segmentation Analysis | Machine Learning

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit

- Developed a K-Means clustering model to identify distinct customer groups based on purchasing behavior.
- Performed data preprocessing, exploratory analysis, and feature preparation for customer segmentation.
- Built an interactive Streamlit dashboard to visualize customer segments and clustering results.

LICENSES & CERTIFICATIONS

- IBM Full-Stack JavaScript Developer Professional Certificate — IBM / Coursera
- Foundations of Data Science — Google / Coursera
- Data Analytics Job Simulation — Deloitte Australia / Forage
- Java Fundamentals — IBM
- Introduction to Python — IBM
- Software Testing — NPTEL

ACHIEVEMENTS & LEADERSHIP

- Coordinated TechVistra 25 and received a Special Award for outstanding contribution and performance.
- Organized and hosted an ISR session on AI and Data Science at Shenoy Nagar Corporation School; received official college certification.
- Served as Master of Ceremony for Audi Fest 26 and YUKTI'26 - INFYNIX National Conference.
